## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-40 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are directed to a program per se. The specification indicates that the claimed invention can be carried out by a sequence of instructions. While the program contains functionally descriptive material the recording of the functionally descriptive material on some computer-readable medium, which would enable the functionality to be realized, fails to be recited.

### ***Claim Rejections - 35 USC § 112***

2. Claims 2, 5, 13 and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The steps recited on these claims fail to be clearly related to the previously recited steps, note that in the independent claims the “sequence of averaging calculations” has been recited as including two steps.

***Specification***

3. The last line of the abstract is required to be deleted.

***Drawings***

4. It appears that Fig, 1 of the drawings should be labeled "Prior Art".

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
